Mr. Mean Vatanak
mvatanak36@gmail.com

85B, St 430, Tom Nub Tek, Chom Kamorn, Phnom Penh

To dear Sir or Madame.

I am an IT programming student at the Royal University of Phnom Penh (Graduated). I am familiar with the communication, flexibility, Greeting, working under pressure, teamwork, and responsibilities of this position. I believe I have the skills and experience to be successful in this role.

I am currently working at the Cambodia-ASEAN International Institute, where I have gained experience in the configuration and maintenance of the company network and the installation, uninstallation, and repair of software. Maintain the server's antivirus software, deploy active directory, DHCP server, DNS server, group policy, and join the domain with the domain controller. I also provide support and find fixed solutions, as well as maintain and upgrade. I have experience with project management, such as business flow analysis or structure to create and implement a school system for the user with a payment process, registration flow, divided classes, student and teacher management, ID card issuance, issuing certificates, all system user management, and all kinds of reports responsible for verifying I/O in the system. Creating and maintaining shared folders with group policy for a retention company with Sinology, Mikrotik WAN/LAN configuration, port forwarding, blocking any websites, hotspots, VPN remote access configuration, firewall, and limited internet speed for some users. understanding of the AP and Unifi configuration. install and configure the security of the camera's CCTV. For Office 365, I am a creator and controller user with a Microsoft Education A1, A3 and A5 license. Last but not least, I have experience with hosting websites with domain names, Wordpress, and DNS servers registered with the Ministry of Post and Telecommunications, as well as cPanel and email. For programming, I had to complete the web application system that included the HR system, Fixed Asset System, and Administration Document Control. With the programming skills that I have, HTML, CSS, Bootstrap, Javascript, jQuery, PHP, and Laravel.

At The iCON Professional Building, where I previously worked, I gained experience configuring switches, Mikrotik, Routers, WAN and LAN; maintaining websites www.iconprofessional.com and www.amtgp.com; controlling system security of access cards and system attendance; installing and updating anti-virus; installing and solving software and hardware of computers;

At SivlerTown Apartment, where I worked previously, I gained experience in solving problems for tenants, getting payments from customers, greeting visitors and guests, providing information, preparing meeting rooms for customers with associates, answering the telephone and transferring documents, keeping a daily record of incoming and outgoing calls, making notes on customers' problems or needs, informing the relevant employees/departments, and doing reports every day. Having studied English for four years, I am good at speaking and writing. I studied speaking with native English speakers for one year.

I would like to apply for the position of network maintenance supervisor to work at your company because I want to earn experience, use my experience, and improve my skills. I am available for an interview at any convenient time and you can call me on 010300667 or 077300667.

I look forward to meet you.

Yours faithful
